IF YOU'VE GOT A BUILDING,  
WE'VE GOT IT COVERED

# ELASTADECK<sup>™</sup>

REPAIR | REFURBISH | PROTECT | WATERPROOF

# How we work with you

## Free Survey

Our site surveys are FREE. Our first step is to listen, to learn and to collaborate. One of our highly experienced Area Business Managers will meet with you to discuss your project and undertake a free survey of your roof, noting any issues and defects to ensure every aspect of the project is clearly understood and documented thoroughly.

## Project Specification

Following your survey, your Area Business Manager will recommend professional contractors to complete your installation. A detailed, bespoke written project specification will then be issued including CAD drawings as required. This specification explains how every detail of the roof will be tackled. While all Tor specifications are designed to be as easy to follow as possible, your Area Business Manager will always be on hand to answer any questions you might have.

## Installation

Your Area Business Manager and our technical service team will be there to monitor the various stages of your installation and ensure the project specification is followed correctly. You can be safe in the knowledge that we partner only with contracting companies whose customer service principles and values are aligned with our own.

## Aftercare

For added peace of mind, all of our systems are offered with a comprehensive range of no quibble warranties. We are also pleased to offer building owners our insurance-backed guarantee, TorGuard.

# Elastadeck

Installs in hours, lasts for years. The complete solution in intelligent waterproofing systems for communal balconies, walkways and terraces.

**Tor Coatings has been supplying high quality waterproofing systems for communal balconies, walkways and terraces for over forty years. Elastadeck has been developed to offer a low odour, non-slip, waterproofing system with the fastest installation time on the market.**

Elastadeck is a low odour, fast-curing coating system, designed to deliver an extremely durable, hard-wearing surface with unparalleled waterproofing. The system's breakthrough 2-coat technology allows projects to be completed in record time with minimal disruption or downtime.

## Performance guaranteed

The Elastadeck system uses fully reinforced moisture-triggered polyurethane technology to provide a walkable waterproofing membrane. It offers accelerated curing times which adds to the efficiency of balcony and walkway projects.

Being liquid applied, it encapsulates every detail seamlessly to provide a breathable, slip resistant, waterproof surface, every time.

## Features and benefits

### Fast Installation

The Elastadeck system offers the fastest installation time on the market

### No Disruption

Rapid installation means minimal disruption and greater cost benefits

### Proven Track Record

Tor Coatings has over 40 years' experience in roof waterproofing systems

### Low Odour

Elastadeck is a low odour system which means minimal disruptions to the day-to-day operations of a building

### Watertight Guarantee

For added peace of mind, Elastadeck comes with a comprehensive range of no quibble warranties

### Global

We are part of one of the world's largest paint companies so have the scale to deliver

### Cost Effective

Our 15 and 20 year systems ensures that we can deliver the ultimate, cost effective, high performance solution

### Durable & Slip-Resistant\*

Resin technology delivers a tough, slip-resistant surface option with unparalleled waterproofing

### Seamless

Once applied, Elastadeck provides a seamless, joint free waterproof barrier and resists ponded water

## Our watertight guarantees

At Tor Coatings, we are passionate about the work we do and take pride in delivering the results you want, the way you want them. That's why our service doesn't just end when your project ends.

By choosing to work with us, you can be safe in the knowledge that you'll receive a high quality system, outstanding service and complete peace of mind throughout your project and beyond.

All of our roofing systems are covered by our comprehensive no quibble warranties. Each scheme is also covered by an insurance backed policy which we pay for\*\*. And by no quibble, we mean just that. If you experience complications with any aspect of your project following completion, our experienced team of site specialists will work with you to resolve any issues as quickly and efficiently as possible. No challenges, no problems, no fuss. That's our promise to you.

\*Slip resistance is a selectable option

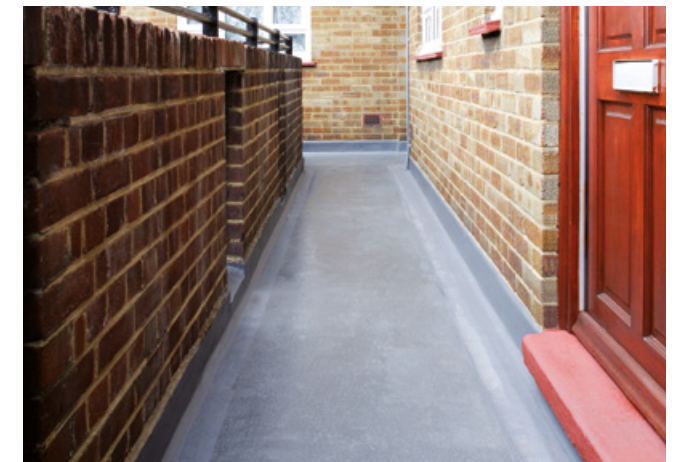

## Taking quality outside

Elastadeck is designed for the resurfacing and waterproofing of open-air surfaces including communal and private balconies, walkways, terraces and external escape routes.

The system can be applied over existing substrates or incorporated into warm or inverted designs, allowing for insulated decks or paved surface finishes. While particularly suited to social housing, it can also be specified for balconies and walkways in hotels, hospitals and shopping centres and access areas in car parks.

Outdoor spaces like balconies and terraces are constantly exposed to harsh weather conditions and heavy foot traffic. Without suitable protection, these surfaces will inevitably erode over time and lead to further issues such as cracks, leaks and structural damage.

Elastadeck has been specifically developed for use on heavily trafficked communal walkways, stairs and private balconies to deliver robust, high-performing and long-lasting protection, whatever the weather.

### Designed to wear well

Elastadeck is specifically intended for use on medium to high wear areas on communal balconies, walkways and terraces consisting of bare concrete or asphalt. However, the system can be installed over most existing surfaces and even incorporated into warm or inverted designs to allow insulated decks or Pavour surface finishes.

### Designed not to disrupt

Unlike other systems, Elastadeck emits very low levels of solvent odours during installation. This not only minimises the risk of disruption in areas of heavy foot traffic, but also offers a safer, more user-friendly experience for building occupants.

## The fastest installation time on the market

Within as little as just three hours, the surface will be ready for foot traffic or additional coating with the Elastadeck floor coatings range.

Elastadeck offers the fastest installation time ever seen in a balcony coating system. Its breakthrough low odour technology can be applied in as little as 2 coats, allowing your project to be completed in record time with minimal inconvenience to building occupants.

Once installed, the system delivers an exceptionally tough anti-slip finish with unparalleled waterproofing and long-lasting protection.

By seamlessly sealing all cracks and small holes on the surface, Elastadeck delivers an air-tight protective coating that eliminates the risk of water penetration and provides complete protection against the elements, even the harshest environments.

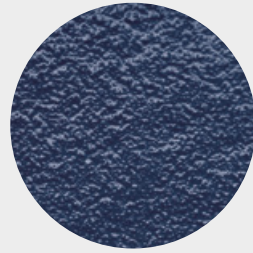

## Our colour range

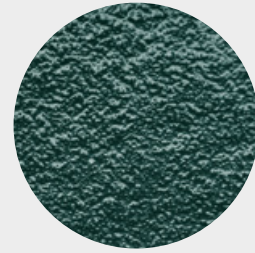

Elastadeck has a wide range of standard colours currently available.

**Red**  
RAL3003

**Blue**  
RAL5011

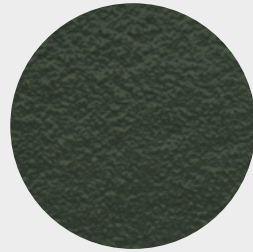

**Green**  
RAL3003

**Tan**  
RAL8004

**Graphite Grey**  
RAL7024

**Holly Green**  
RAL6007

**Safety Yellow**  
BS 08E51

**Light Grey**  
BS 00A05

**Grey / White / Blue  
Black Flake Finish**  
505043

A flake finish effect has also been introduced using grey, blue and white PVC. This is covered with a clear lacquer version of the topcoat to give a more decorative finish which is also easier to clean.

We have made every effort to make the colours printed as accurate as possible. Unfortunately, we cannot guarantee an exact colour match of the printed document to the colours of the actual products and the colour appearing on print should not be relied on as being such. If you are unsure of a colour, please contact us for further information.

### Unlimited Colour

We can create bespoke colours to suit all of your project needs and requirements. Call us on **01483 791 398** to find out more.

## 20 years of protection in just 2 coats

With a watertight guarantee and a comprehensive range of no-quibble warranties, you'll be safe in the knowledge that your building will be protected for years to come.

The Elastadeck System can be specified with warranties up to 20 years, delivering excellent through life costings.

**TorGuard**

For added peace of mind, all of our clients and specifiers also benefit from our insurance-backed guarantee, TorGuard. TorGuard is provided free of charge for projects installed by our Tor Partners contractor network to give an additional level of cover. If a fault develops due to either an application or product fault then the issue will be remedied under the guarantee.
