KEWDW	WHITE	5KG	£78.5

EpoCoat WD is a high solids, high performance, water dispersed epoxy coating for the treatment of floors and walls and is designed to be user and environmentally friendly, containing no solvents and being of a very low odour during application.

EpoCoat WD is available in Clear and in a range of twelve standard colours, other RAL and British Standard colours are available upon request (subject to minimum order). As with other epoxy products light colours exposed to UV light will be prone to cosmetic yellowing of the surface.
